DETAILED ACTION

Drawings

1. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Claim 3 is objected to because of the following informalities: In claim 3, line 2, "an amount" should be --an amount--. Appropriate correction is required.

3. Claims 1, 5, 6, 7, and 9 are contains the trademark/trade name Teflon. Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a source of goods, and not the goods themselves. Thus, a trademark or trade name does not identify or describe the goods associated with the trademark or

Art Unit: 2821

trade name. In the present case, the trademark/trade name is used to identify/describe polytetrafluoroethene and, accordingly, the identification/description is indefinite.

Allowable Subject Matter

4. This application is in condition for allowance except for the following formal matters:

The objections as that described above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

5. The following is a statement of reasons for the indication of allowable subject matter:

Claim 1 recites a method of energizing a plasma antenna using power from the discharge of an electropulsion engine comprising the steps of providing a solid bar, contacting an electrode with the solid bar, charging a capacitor using a power processing unit, firing a spark ignitor to create an initial conducting path for a primary discharge, discharging electromagnetic particles initiated by pulse forming circuitry, releasing energy from the capacitor across the electrode gap, and ablating several layers of the solid bar, the ablation products ionizing and accelerating by an electromagnetic Lorentz force, and generating a pulse.

Claim 8 recites a plasma antenna system comprising a propellant ad feed system, a capacitor charging power processing unit, an energy storage capacitor, and

Art Unit: 2821

wherein the energy is release over an electrode gap and resultant ablation products are ionized and accelerated by an electromagnetic force, thereby producing a pulse.

None of the prior arts shows or suggests this plasma antenna and method of energizing the plasma antenna.
